

Safe and Fuel Efficient Driver (SAFED) Training

Who is it for?

Expertly designed to provide individuals with a fundamental understanding of Safe and Fuel Efficient Driving techniques, System Training's SAFED course is suitable for anyone looking to lower their fuel, vehicle and insurance costs, whilst also promoting a reduction in environmental pollution.

Benefits to the driver

- ▷ Promote your own safety and that of your vehicle, load and other road users
- ▷ Develop your skills
- ▷ Expand your knowledge
- ▷ Increase your confidence
- ▷ Enhance your employment opportunities

Benefits to the employer

- ▷ Highly trained, knowledgeable workforce
- ▷ Significantly reduce your fuel spend
- ▷ Improve the residual value of your vehicles
- ▷ Reduce vehicle downtime and costs
- ▷ Potentially reduce insurance premiums
- ▷ Reduce environmental pollution

The course

Available on a range of vehicles, the SAFED training programme equips learners with the indispensable expertise required to enhance road safety, minimise the risk of an incident, reduce stress and fatigue, lessen fuel consumption,

and increase confidence in vehicle control and utilisation.

Not only are SAFED techniques effective, they are simple and easy to apply, meaning drivers and employers alike can begin to reap the benefits from day one.

Each course specifically includes:

- ▷ An introduction to SAFED
- ▷ Preliminary SAFED theory
- ▷ Pre-start vehicle checks
- ▷ Driving assessment
- ▷ Vehicle and road craft instruction
- ▷ Driver validation exercise
- ▷ Underpinning knowledge exercise
- ▷ Assessment
- ▷ Summary report and feedback

On completion, individuals will attain a SAFED certificate evidencing their ability to consistently endorse best practice whilst out on the road, ultimately enhancing a business' profile and profitability.

"The financial savings are outstanding – we knew that improving driving techniques and knowledge across our fleet would have benefits, but we never thought it would be to this extent."

Brian Wheadon, Support Services Director, Yodel
