

# Dangerous Goods Safety Advisor

## Who is it for?

Since 1st January 2000, 'The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations' have incorporated the requirement for businesses involved in the transportation of dangerous goods (including associated activities) to appoint one or more Dangerous Goods Safety Advisors (DGSA).

To become a DGSA, an individual must already hold a valid ADR driver training certificate and must pass a written SQA examination.

## Duration

5 days

## Benefits to the individual

- ▷ Enhance your employment opportunities
- ▷ Work effectively in your current job
- ▷ Become an expert in your field
- ▷ Demonstrate Continuous Professional Development

## The course

Delivered by industry experts, System Training's DGSA course is specifically designed to familiarise learners with the ADR European Agreement concerning the International Carriage of Dangerous Goods by Road Council Directive.

Individuals will be equipped with the specialist skills and knowledge required to ensure that businesses are monitored, advised and investigated appropriately to assure compliance with the rules governing the transportation of dangerous goods. Learners will be able to:

- ▷ identify the hazard and degree of danger of a particular substance
- ▷ specify the packaging, bulk and tank requirements for a particular substance
- ▷ identify the requirements for marking of vehicles for UK and international journeys
- ▷ produce documentation where required

## Benefits to the employer

- ▷ Ensure legal compliance for the monitoring, reporting and transporting of dangerous goods by road
- ▷ Increase operational safety
- ▷ Reduce the risk of an incident
- ▷ Promote cost-effectiveness

## Progression

- ▷ Become a consultant for the transportation of dangerous goods
- ▷ Move into other modes of transport (i.e. rail, sea and air)
