

# LGV and PCV Operator Licensing Consultancy

It is a legal requirement that businesses hold an appropriate Operator's Licence if their undertakings involve the use of public service vehicles or goods vehicles over a certain weight. Implemented by the Traffic Commissioners and administered by VOSA, the Operator Licensing system ensures that such vehicles are used safely, properly, and with consideration for the surrounding environment.

## Benefits

- ▷ Ensure compliance with Operator Licensing requirements
- ▷ Avoid a Public Inquiry and the chance of having your licence revoked, suspended or curtailed
- ▷ Increase operational safety
- ▷ Improve staff retention
- ▷ Promote cost-effectiveness

## Why choose System Training?

At System Training, we understand that maintaining compliance with Operator Licensing requirements is absolutely critical to the day-to-day running of your business. We also understand that achieving such compliance can prove to be a bewildering and time consuming process.

With this in mind, our specialist consultant can offer you comprehensive advice and guidance on all matters concerning Operator Licensing, giving you the reassurance that your business is, and remains, completely compliant with specific requirements outlined by the Traffic Commissioner.

## Our package

Designed to meet your specific business needs, System Training's Operator Licensing consultancy solution provides you with fundamental assistance in all aspects of meeting your legislative obligations.

What is more, the clear, coherent information and direction you will receive from our industry experts will help you to embed correct operational procedures moving forward, thereby allowing you to actively sustain legal compliance throughout your business.
